

AMGEN[®]

Pioneering science delivers vital medicines™

One person alone does not beat cancer.

At Amgen, our deep understanding of human genetics is helping create innovative medicines that treat cancer and help relieve chemotherapy-related side effects such as anemia and neutropenia. Fighting cancer is a battle to be fought on multiple fronts, requiring not only breakthrough science and therapies, but also the dedication of many healthcare professionals, caregivers and support organizations.

That is why we are committed to working closely with healthcare professionals to provide educational resources for patients and caregivers, and tools to assist clinicians in the delivery of care.

That is why we created programs such as the **Reimbursement Connection**[®] for healthcare professionals and the **Amgen**[™] **Oncology Assistance** program for patients, an industry-leading access program to ensure that cancer patients who need our medicines can receive them.

And that is why we created the national **Breakaway from Cancer**[™] initiative, a complementary component to our sponsorship of the Amgen Tour of California, to benefit nonprofit organizations that provide valuable programs and services to support cancer survivorship. The 2007 Breakaway from Cancer initiative is proud to support two such vital organizations. Celebrating its 25th anniversary, **The Wellness Community** is an international nonprofit organization dedicated to providing free education and services that offer support and hope to people affected by cancer. The oldest survivor-led cancer advocacy organization in the country, **The National Coalition for Cancer Survivorship** is a highly respected, authentic voice at the federal level, advocating for quality cancer care for all Americans and empowering cancer survivors.

To learn more about how you can support the millions of cancer patients around the country through these important organizations, visit **breakawayfromcancer.com**
