

Health Equity at Amgen: Outcomes Within Reach

At Amgen, we believe health is equitable when everyone, everywhere can be as healthy as possible regardless of where you come from, what you look like, or what language you speak. To help achieve this, we are working to ensure that all people have access to available treatment options, diagnostics and the ability to participate in clinical trials.

We approach health inequities recognizing that we are part of the broader community, and we seek to be a strong partner, bringing our voice, resources and diverse collaborations to advance bold initiatives and policy changes that address unfair and avoidable differences in health.

invested in 2021

82
projects funded

Therapeutic areas of focus:
Oncology, Cardiovascular, Inflammation

Representative Product Development

Supporting improved clinical trial diversity and representation to meet the needs of those that have been historically underrepresented, undertreated, understudied and underdiagnosed.

EXAMPLES OF WORK:

Working to increase diversity and improve representation in clinical trials

Founding sponsor of (IMPACT) Improving Patient Access to Cancer Clinical Trials, a multi-year nationwide program to increase cancer clinical trial enrollment, retention, minority participation and equitable access

Sponsoring Project I.M.P.A.C.T. 2.0 coalition to increase the awareness, knowledge and participation of African American physicians and consumers in all aspects of biomedical research and clinical trials

Supporting initiative to increase opportunities for cancer patients in underserved communities to identify and enroll in relevant regional clinical trials through an integrated trial eligibility screening tool and navigation support

Increasing access to oncology trials for historically underrepresented communities

Amgen Community Oncology Research Collaborators makes it easier for community oncologists at more than 200 sites across the U.S. to refer their patients to Amgen studies

Launched in October 2020, **RISE** (Representation In Clinical ReSEarch) is an Amgen program dedicated to improving the diversity and representation of participants in the company's clinical trials. RISE is working to exceed industry standards for clinical trial diversity and representation and to help Amgen develop new medicines studied in participants who better reflect the populations impacted by certain diseases or conditions.

Comprehensive Health Education

Making information easier to access, trust, understand and use because we recognize that it empowers people to take control of their health and can put better outcomes within reach for more people.

EXAMPLES OF WORK:

Empowering healthy living

Launched a three-year grassroots program that will raise awareness of cardiovascular health and prevention strategies while engaging and supporting community members to create a culture of health.

Working to increase primary care providers' understanding of cancer clinical trials and their capacity to encourage patients to inquire about cancer clinical trials when making treatment decisions

Equipping patients with the right information with our partners

Raising awareness among young women, women of color, underserved communities and those facing disparities in bone health and its impact specifically on breast cancer patients

Health Equity Advancement and Leadership (HEAL) program will partner with four local healthcare centers to target upstream social and systemic factors for asthma with an aim to reduce the burden of asthma in underserved populations

'No One Missed' campaign focused on raising awareness of biomarker testing among NSCLC lung cancer patients and caregivers, including in medically underserved communities

PHENPath.com, a first of its kind digital tool to support African American prostate cancer patients in making shared treatment decisions, including those related to bone health

Not One More Life Trusted Messengers Program, aiming to mitigate the impact of COVID-19 in African Americans and Latinos to improve outcomes in respiratory care

Accessible & Inclusive Healthcare

Strengthening the health of communities and care systems so all patients have equal access to a longer, healthier life.

EXAMPLES OF WORK:

- Since 2001, the Amgen Safety Net Foundation (ASNF) has helped hundreds of thousands of patients with financial need gain access to Amgen medicines at no cost
- Provided approximately \$2.3 billion* of Amgen medicines at no cost to uninsured or under-insured patients in the United States

Amgen partnered with Humana to conduct a study among patients who have been hospitalized for cardiovascular-related conditions. Barriers most often reported by respondents included food insecurity, financial strain, housing quality, and transportation barriers. Amgen and Humana will use the findings to identify, implement, and evaluate potential interventions.

Partnering with faith-based organizations to raise awareness of diseases that disproportionately impact underserved communities and people of color, including osteoporosis, lung cancer, prostate cancer, and multiple myeloma

Inspiring the Scientists of Tomorrow

The **Amgen Foundation** is guided by the belief that everyone needs science, and science needs everyone. By broadening access to engaging and inspiring science programs, we are working to equip future generations with the essential skills needed to thrive in our increasingly complex world.

Our north star is to level the playing field so that all learners have access to high-quality science education. That's why we support free virtual learning platforms, such as **Khan Academy** and **LabXchange**, so students everywhere can experience the trial and error that comes with science learning.

Raising the spotlight on health inequities

For nearly a decade, the **Amgen Health Equity Summit** has fostered solution-focused dialogue among diverse thought leaders and patients to overcome health disparities. The 2021 summit focused on disrupting health disparities through partnership.

"Achieving health equity has been an elusive dream in our society, but it doesn't have to be. At Amgen, we work together with partners that share the goal of reducing disparities in health access and outcomes. While this may be a long journey, we are determined to keep moving forward."

— Bob Bradway, CEO and Chairman, Amgen

Congressional Black Caucus Foundation

Asian Pacific American Institute for Congressional Studies

Congressional Hispanic Caucus Institute

Congressional Black Caucus Institute

Partnering with the Congressional Black Caucus Foundation, the Congressional Hispanic Caucus Institute and the Asian Pacific American Institute for Congressional Studies to convene thought leadership on health equity policy issues while also developing resources and health equity programming for the Quad Caucus of state legislators and public health officials. Additionally, partnering with State Black, Hispanic and Rural Caucuses to advance equitable access to health care.

NBCSL National Black Caucus of State Legislators

National Caucus of Native American State Legislators

NHCSL National Hispanic Caucus of State Legislators

Amgen is one of the founding sponsors of the Congressional Black Caucus Foundation's John Lewis Racial Justice Fellowship program with a focus on health equity
